

Smile Centre

Summer edition.

Welcome to the first edition of our newsletter, which we will publish quarterly to keep you up to date with tips, ideas, treatment and practice information. We aim to keep you and your family's dental health the very best it can be, and pride ourselves on first class patient care. We have a fresh new look and the reliable professional service that you are used to continues. We also want to say a big thank you to you, our loyal patients for your continuing support. To help us do this, perhaps we can draw your attention to the following promotions:

MAKING DENTAL CARE MORE AFFORDABLE !

Interest free payment plans, now available

Patients can now apply for an interest free loan through **GE Money CareCredit** to help cover the costs of dental treatment. Specifically for healthcare expenses, Care Credit allows you to:

Begin treatment now – then pay for it over time with an interest free plan.

This may facilitate access to our extensive range of services including dental implants and veneers

A Brighter Smile in time for the Holidays:

For all those of you who would like a brighter smile ready for the holiday season.

Kör Whitening's technology : Until the end of December we are making Whitening available to our patients for **\$950** (usual price \$1,200)

Do you have missing teeth? Dental Implants could be the answer for you

Dental implants are the most successful form of treatment for replacing missing teeth. They improve the appearance of your smile and function of your bite.

The benefits of dental implants:

- A permanent solution to missing teeth
- Identical to your natural teeth in appearance
- Restore your bite
- Improve the appearance of your smile
- Helps reduce the appearance of facial ageing caused by missing teeth

Dental Implant treatment is provided 'in house' by Jon and Keith.

Do you suffer from loose dentures?

Dental implants can be used to anchor dentures firmly, allowing you to eat and chat with confidence whilst providing increased comfort.

If you want a solution to missing teeth, loose or partial dentures, ask Jon or Keith how dental implants could change your life

Do you have chipped, discoloured or uneven teeth?

Porcelain veneers could completely transform your smile.

- When bleaching alone won't work, veneers can create a beautiful white vibrant smile
- To straighten, reshape and accomplish minor realignment of your teeth.
- Improve shape, length, size and colour of teeth.

Dr Jon Kerr BchD (Leeds UK)

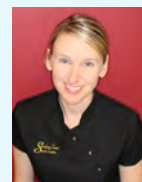

Jon qualified in 1997 from the University of Leeds. He is widely experienced in all aspects of general dentistry and has a particular interest in cosmetic procedures and teeth whitening.

Whilst Jon takes great interest in the clinical aspects of dentistry he is always focused on the patient and takes great care to ensure every visit is a comfortable and pleasant experience.

Dr Keith Doonan BDS (London), M Clin Dent (Pros), FRACDS

Keith qualified in 1993 from the Royal London Hospital School, then went on to complete his Masters in Prosthodontics at Kings College London. Subsequently he became a Fellow of the Royal Australasian College of Dental Surgeons. His area of expertise is dental implants and full dentures and he is frequently invited to lecture on dental implants to other dentists.

Sophie

Sophie is our dedicated Hygienist, providing an excellent standard of treatment with a gentle approach to patient care. Sophie graduated in 2001 and keeps her knowledge

up to date by attending continuing education courses. Sophie loves brightening peoples smiles with teeth whitening, an area she has extensive experience in.
